I'm 26 years old, open-minded, self taught, with a love for all things related to web developing. I often use my free time to learn new technologies or to find different approaches for solving a problem, or to do anything that can make me a better coder.

I started learning JS last year while studying for mechanical engineering, and now I feel confident enough to work with it and take the next step on my career.

TECH STACK

HTML5

CSS3
(+SASS)

JAVASCRIPT

REACT

NODE.JS

GIT

MYSQL

mongoDB

MONGODB

POPULAR NPM PACKAGES

REACT

- Styled components
- Chakra UI
- React Router Dom
- React Query
- Framer Motion
- React Icons
- Formik
- React Table
- Lodash
- Date Fns

NODE.JS

- Mysql2
- Sequelize
- Winston
- Express
- Bcrypt
- Config
- Jsonwebtoken
- Moongose
- Nodemon

PROJECTS

HUSH SUNRISE APP

A fully responsive React CRUD application using my own backend for storing data, fetching data and authentication. This app is my main portfolio project and simulates a real SPA with hotels, residences and resorts. Users are able to login, recover their password and choose their preferences at profile which is stored at the database.

This app features:

- Chakra Ui was used to style components.
- React Query was used to make API calls.
- Local Storage was used to persist data.
- React Router Dom was used for switching pages.
- Backend was built on Node.js, MySQL, Sequelize.

I worked with Hush Sunrise for a few weeks to have a bigger website portfolio and get to know better the 'ins and outs' of a bigger project.

THE PORTIFOLIO WEBSITE

A fully responsive React application. This app is my personal website project, the one you're seeing right now and it was made to show a little bit of myself and work.

This app features:

- Styled components too style the components (CSS in JS).
- React Query was used to make API calls.
- The backend was made on Node.js, with express and nodemailer.
- React Router for the 2 available routes.

Although this website was done with the sole purpose of showing a little bit of my work and myself, I got to learn more about styled components and it's usage, and now I feel very confident to develop applications with this technology.

EDUCATION

COURSES I HAVE COMPLETED:

- Node.js: The Complete Guide to Build RESTful APIs – UDEMY
- Curso Web Moderno Completo com JavaScript 2021 – UDEMY
- The Ultimate MySQL Bootcamp: Go from SQL Beginner to Expert – UDEMY
- REACT QUERY: Server State Management in React
- The Ultimate Git Mastery Course – Mosh
- CSS – The Complete Guide 2021 (incl. Flexbox, Grid & Sass) – Udemy
- Udemy – React – The Complete Guide (incl Hooks, React Router, Redux)

ANOTHER SKILLS:

- Mechanical Engineering background (ISEL – Instituto Superior de Lisboa)
- English: Advanced level
- Spanish: Advanced level
- Portuguese: Mother language
- Italian: Intermediate level
- Mechanical Engeneering background (ISEL – Instituto Superior de Lisboa)
- Copywriting

CARRER OBJECTIVES

I am looking for a job as junior developer or an intership, preferentially remote. I am available to start immediately. If you think I can be a valuable asset to your company please do not hesitate to contacting me.
